

Mobile Rewards Terminal

At last a 3G EFTPOS terminal designed purely for managing your club member accounts, points and prizes using your existing membership card.

This mobile Club Rewards terminal simplifies all your non cash member transactions for Loyalty points, Raffle prizes, Golf prizes, Bar levies and vouchers.

It can manage all of your member prizes, levies and points so your members can use value from their club accounts anywhere in your club that you choose, as well as at independent caterers, pro shops and participating 3rd party businesses. Extensive management options allow each club to configure their own program rules to maximise automation and eliminate errors.

Automation eliminates time consuming administration, reduces staff training, account errors and compliance risks.

Members can request an instant mini statement from the terminal that shows points and points voucher balances, plus the last 10 transactions. Members can also access and manage their own accounts at a rewards pc or kiosk to view their points, points vouchers and tickets accrued in prize promotions.

Member's Golf prizes can be imported quickly and simply from Miclub and Micropower. Bar levies can be imported or added directly. The terminal can link automatically to existing gaming and membership systems. Points can also be exported to LAG compliant VISA debit cards. Don't have a gaming system? Use Club Rewards for gaming promotions and to collect valuable player activity data. The terminal can access multiple accounts and allow split payments for purchases if points balance is insufficient.

Automatic promotions can print instant tickets, tickets at kiosk or automatically print into a barrel. Extensive rule management accommodates all variables and regulation requirements.

Built using world leading EFTPOS technology by INGENICO, this terminal automatically manages all the requirements of your member rewards program and ensures regulation compliance.

Your members can use their points and vouchers for;

- Goods & services from a pro shop, clubhouse, independent caterer or 3rd party business.
- For crediting to a club account.
- For use of a practice area, competition fees, coaching, golf cart hire, green fees.
- Membership fees.
- For any specific item (or for items generally) from a participating retail outlet.
- Gift cards or gift vouchers for redemption at any retail outlet.
- Goods available from a butchery, bakery, grocery, etc.
- Transfer to Club Rewards VISA Debit card and spend anywhere that accepts VISA

The terminal can be used at 3rd party retailers who will pay your club to cross promote with your club to your members to generate even more member value.
