

Club Rewards®

Generate more value for your members

A simple yet powerful solution to managing your member activities that generates new value for everyone involved with your club. Members, management, staff, suppliers and sponsors.

Club Rewards mobile rewards terminals generate new value from your existing member rewards programs by allowing your current membership cards to be used wherever your members are. Any activity or event, in-house or away from the club is linked live to the club's systems via the 3G or 4G mobile data network.

Swipe your members cards on Club Rewards 3G Mobile Rewards terminals to award and redeem points for raffles, sports prizes, bonus points, volunteer's meals and drinks, contract caterers and 3rd party businesses. Issue promotion tickets on the fly for Door prizes or bonus ticket and timed attendance promotions.

Eliminate paper vouchers, reduce administration, find out more about the activities of your members and generate more value for everyone.

- Earn points
- Award points
- Pay by points
- Issue assigned vouchers
- Redeem vouchers
- Record attendance (Door prizes etc)
- Issue instant promotional tickets
- Print promotional tickets into a barrel
- Print member account statements
- Print activity summaries

Club Rewards works with all major membership, gaming and POS systems. It can amalgamate disparate gaming and membership systems within a group and has extensive promotional capabilities.

Generate Group is also an authorised EFTPOS reseller and we offer rebates on EFTPOS Merchant Service fees to fund your technology purchases. You could get this new competitive advantage bundled with integrated EFTPOS for no more than you currently pay now just for EFTPOS alone!

The Juniors Group have been with Generate for 12 years and during that time we have worked together to solve operational issues around our clubs using different gaming systems. We have utilised their Club Rewards product to do this and other things like having mobile member swipe terminals that allow us to move around the club giving bonus entries after midnight and interacting with external businesses for promotional purposes.

Paul Godfrey and his team have always done everything possible to assist us in obtaining the best results.

I have no problem recommending Generate Group

Paul Muir, General Manager Customer Services

Expand your Footprint

Generate new value for members by involving 3rd party merchants in cross promotions with your members.

Participating merchants buy points from the club to issue to members and can issue tickets in promotions of their own or in conjunction with the club. Tickets produced by merchants create floor traffic for the club when they are returned to the club barrel. Merchants will pay the club for promotional services and for their points. Club Rewards software maintains accounts and produces merchant statements.

Expand your member benefits with the Visa Debit Card designed for your club members.

Club Rewards Visa Debit cards provide the ultimate customer experience for your members. Your members can move their rewards points to this LAG compliant Visa Debit card.
